

## Kevin Flynn

Full-Stack Contract Engineer (React / Vue / Node / AWS)

Sydney, Australia | Available Immediately | Full Working Rights (Partner Visa)

0468 300 168 | [flynn85@gmail.com](mailto:flynn85@gmail.com) | [kubedev.co.uk](http://kubedev.co.uk) | [github.com/k-flynn-webdev](https://github.com/k-flynn-webdev)

---

## SUMMARY

**Full-Stack Contract Engineer** with 6+ years delivering solutions across **React, Vue, Node, and AWS**. Experience with Monorepos and Microservices architectures. A **product-minded** developer known for rapid onboarding and delivering high-impact results - from **legacy migrations** to **improving test coverage**. I focus on performance, reliability, and immediate value-add with 6–12 month engagements.

---

## CONTRACT PROFILE

- Available: **Immediate (Sydney-based)**
  - Contract Preference: **6-12 months**
  - Work Setup: On-site / Hybrid / Remote
  - Work Rights: Full Australian Working Rights (Partner Visa)
  - Engagement: Open to day-rate contracts
  - Ramp-Up: Productive within **1-2 weeks in new codebases**
- 

## KEY IMPACT & DELIVERY

- Improved page performance by **15% (Lighthouse)** on high-traffic SEO pages
  - Delivered **zero-downtime deployments** using AWS + blue-green strategies
  - Built **scalable component libraries** across multi-team environments
  - Maintained **90%+ test coverage** across production systems
  - Rapidly onboarded into **legacy + microservice architectures**
- 

## CORE STACK

### Frontend

React, Next.js, Vue, Nuxt, TypeScript, SCSS

### Backend & Infrastructure

Node.js, AWS (Secrets Manager, Deployments, Cloudwatch), Python (Django), PostgreSQL / MySQL

### Testing

Cypress, Vitest, Jest (90%+ coverage environments)

### DevOps & Delivery

CI/CD (GitHub Actions), Docker, Agile / Scrum

---

## PROFESSIONAL EXPERIENCE

### Full-Stack Developer (Contract)

TM Beta Consulting - London / Remote | Aug 2025 - Present

- **Product Delivery:** Architected and delivered an internal React-based cross-team business glossary ([Next.js](#)) used for onboarding and knowledge sharing
  - **DevOps:** Implemented CI/CD pipelines using **GitHub Actions**, consistent low-risk deployments
  - **Engineering Velocity:** Accelerated feature delivery by using **AI-assisted workflows**
- 

### Full-Stack Developer

Bionic - London, UK | Apr 2023 - Oct 2025

- **Architecture:** Migrated legacy Rails monolith to a Vue/Nuxt micro-frontend stack, significantly improving scalability and team delivery velocity (DX)
  - **Deployment Safety:** Optimised and maintained zero-downtime Canary deployments using AWS CloudWatch monitoring and automated health scripts
  - **Performance:** Achieved a 15% Lighthouse uplift on high-traffic SEO pages through advanced code-splitting and asset optimisation
  - **Systems & Tooling:** Developed and maintained a shared UI component library used across multiple teams to ensure design consistency and cross-product reusability
- 

### Full-Stack Developer

Collective Food - London, UK | Oct 2021 - Jan 2023

- **Architecture:** Improved customer ordering flows removing manual processes and improving results (UX)

- **Testing:** Increased test coverage to 90%+ by breaking large functions into smaller testable parts, reducing regressions in production
  - **Modernisation:** Migrated Vue 2 to Vue 3 (composition API), improving maintainability and performance
  - **Internationalisation:** Integrated i18n into the customer facing app (French) ready for future planned expansions
- 

## Front-End Developer

Address Intelligence - London, UK | Oct 2019 - Oct 2021

- **Performance:** Delivered high-precision dynamic print templates with 100% rendering accuracy
  - **Architecture:** Migrated Angular app to Vue while maintaining feature parity
  - **Systems & Tooling:** Improved a shared UI component library used across the team to ensure design consistency and cross-product reusability
- 

## Technical Animator & Tooling Specialist

UK Games Industry (TT Games, 22 Cans, Freelance) | 2008 - 2019

- **Automation:** Built automation tools and pipelines (Python / Bash) to support teams from different departments
  - **Communication:** Was key in handling communication between many departments to fulfil tasks
  - **Systems & Tooling:** Developed a keen eye for optimisations and tooling of processes
- 

## PROJECTS

**BusyBz** - Full-Stack Scheduling Platform

Nuxt, Docker, SQLite

- Designed and deployed a production-ready scheduling platform solving complex coordination logic

**Minitrack** - Personal Data Tracking App

Nuxt, Docker

- Long-running production app demonstrating full lifecycle ownership (build / deploy / maintain)

**Pomodoro Timer** - UI/UX Focus Project  
Vue, SCSS

- Design-led application focused on performance and frontend polish
- 

## **EDUCATION**

BA Graphic Design & Illustration  
University of Bolton, UK
